

MAKE LIFTING A LITTLE EASIER

Gin Wheel Pulleys offer a convenient way to raise and lower loads with the use of a rope. Simply affix the wheel to a scaffold, barn beam, tree limb or other support bar and reduce the effort needed to lift the load. Gin wheels are a handy tool for lifting building materials, masonry products, construction equipment, buckets and hay bales. They can even be used with clotheslines. The heavy duty cast iron construction and forged steel grab hook with safety latch combine with sealed bearings and a blue powder coat finish to provide smooth movement and long-lasting performance.

- 1,250 lbs Working Load Limit
- Accepts up to 1^{IN} diameter rope
- Heavy Duty 12^{IN} cast iron sheave
- Forged steel swivel hook with safety latch
- Blue powder coat finish
- Sealed bearings
