

SETTING THE BAR HIGHER

All winch bars are made from heat treated steel for extra strength and designed for use with standard winch caps. Each bar has a knurled handle in two sections for improved grip and a flanged mushroom tip end to keep the bar from slipping within the winch cap.

- Painted silver & yellow finish
- Chain binder release end

42313-19 | 34^{IN} Combination Chrome

- Chrome finish
- Open ended

Made from heat treated steel for extra strength and designed for use with standard winch caps. The patented ergonomic bend in the bar allows it to be easily rotated without removal from the winch cap maintaining parallel alignment of the handle and providing optimum leverage with less strain on the operator. Each bar also has a knurled handle in the lead section for improved grip and a flanged mushroom tip end to keep the bar from slipping.

50015-10 | 34^{IN} ERGO 360° Standard

50015-20 | 34^{IN} ERGO 360° Combination

- Open ended

50015-21 | 34^{IN} ERGO 360° Combination Box End
