## About Ancra

Founded in 1969 with a mission to improve safety and security for the transportation industry, Ancra is a world-class leader in the design, manufacture and development of cargo handling and restraint systems. Known for innovative design, quality and attention to customer requirements, our products are hard at work around the world on land, in the air, and at sea. Ancra has built a tradition of innovation, designing and manufacturing systems that set new standards in engineering, quality, and performance.

The Ancra Military line of products is part of the Ancra Cargo Systems division, headquartered in Erlanger, KY. Ancra has three (3) manufacturing and distribution locations in the U.S.A. and one (1) each in Canada, New Zealand, and Australia.

Ancra Aircraft, headquartered in Azusa, CA, is a recognized designer and manufacturer of aircraft components and assemblies for military and commercial aircraft. This division has developed a solid reputation in aircraft seat and restraint fittings.

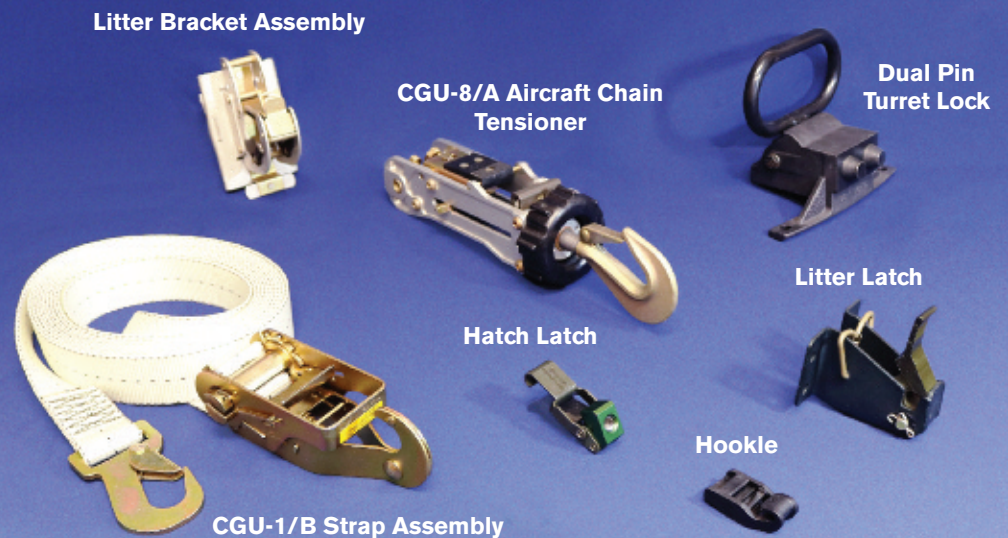

Ancra supports military and commercial customers worldwide.

To find out more about Ancra International and our entire portfolio of products, please visit:

In life-critical situations, equipment dependability is non-negotiable. Ancra's dedicated engineering and quality teams assure that our products meet all the stringent challenges of today's environments.

## **ANCR A MILITARY SYSTEMS** Deploying Solutions

On land, in the air, and at sea, Ankra Military products are used and deployed around the world with the armed forces of the U.S., NATO, and foreign governments. Our core products are: strap assemblies and hardware, custom cargo nets, container latch assemblies and components, various chain tensioner configurations, gunner platforms and slings as well as a variety of custom-engineered cargo restraints, handling systems and products for land vehicle, fixed wing and rotary aircraft, and sea system platforms. All are designed to provide versatile, cost-effective and reliable equipment solutions for all branches of the military.

Ankra has extensive engineering and design capabilities using the most advanced tools and software like solid modeling (“Solid Works”) and 3D printing to achieve quick, accurate, and reliable results. With these advanced tools and software, our engineers continually develop faster, more efficient and robust products to meet the military’s ongoing and rapid deployment requirements.

Our multi-discipline experience allows for consideration of various interfacing areas and harmonious integration of your system or component with other land, air, or sea systems. We can custom engineer products and systems from concepts and prototyping through testing, evaluation and full production.

### **Some notable Ankra attributes:**

- Significant experience with land vehicle, aircraft, and sea operations, structures, and systems, allowing for tailored designs and installations to specific platform applications and integration.
- Extensive knowledge of state-of-the-art materials and understanding of their properties, resulting in optimized designs and weight savings.
- Substantial manufacturing experience in designs that utilize practical and cost-effective manufacturing methods.
- Pride in service, quality standards, and on-time delivery.

## Made to Last

From initial customer specs through design, engineering, testing and final production, Ancra engineers direct each step to assure the final delivered product will meet operational criteria and will perform as desired in a variety of conditions and environments. Ancra is a proven supplier of component parts for the following, but not all inclusive, commercial and military platforms:

- **Land:** Humvee, MRAP, MATV, FMTV, LMTV and other trucks and vehicles
- **Air:** New, retrofit and reconfigured military and commercial planes and helicopters including but not limited to C130, C5, and C17.
- **Sea:** Military landing craft and aircraft carriers to commercial boats

## Steadfast and Strong

Through decades of expertise in design and manufacturing, Ancra has become a preferred supplier to prime defense contractors (e.g., Lockheed, Boeing, Airbus, BAE Systems, AM General and others). Our ergonomic line of fitting products, easy-to-operate latches and hardware, strong and lightweight tiedowns, and our ability to offer efficient designs are globally recognized, specified and valued by our customers. Our team designs, manufactures, assembles and tests our products to the highest quality standards for both military and commercial markets.
