

# ANCRA INTRODUCES THE NEW GENERATION OF RATCHET BUCKLES

<p><b>Standard Handle</b></p>  <p>P/N 44627-10 6,500 lb. (3,000 kg)</p> 	<p><b>Long Handle</b></p>  <p>P/N 44587-10 10,000 lb. (4,500 kg)</p>  <p>New handle is 1.5" longer, providing 20% more leverage.</p>
---	---

**Stronger**—New handle/frame interlock increases strength and durability.

**Positive Lock**—New locking handle guarantees positive lock against vibration release.

**Reduced Wear**—New fast release cam reduces sprocket wear.

**New Frame Design**—Allows more handroom to facilitate strap release when handle is in "open" position.

**New Latch Design**—Makes for smoother and easier operation.

These improved, patented features, combined with high-quality materials and craftsmanship, result in a product which has become the standard of the industry.

The new ratchet buckles are available in standard, and long handled versions, with either a 6,500 lb. or 10,000 lb. load capacity.

*All load capacity information reflects minimum ultimate break strengths of buckles only. Proper webbing must be used in order to achieve these loads.*

*Working loads should be evaluated by user to provide adequate safety margin under normal use.*
