

FLATBED RESTRAINT SYSTEMS

A PASSION FOR QUALITY

You'll feel secure when your load is secured with Ancra.

Because we believe that the cargo restraint system you put on your rig should be perfect. If there's even the slightest hesitation in a ratchet or irregularity in a locking latch, we notice. And we don't let it pass.

Engineered for excellence.

Ancra makes the finest cargo restraint and handling systems in the world. Our engineers design and constantly improve upon a full line of innovative van and flatbed restraint equipment. All to give you, the operator, the biggest advantage on the road.

Quality is everything.

Every Ancra product is constructed of quality materials and tested against the strictest standards for efficiency, safety, and durability. It's equipment that *looks* good, and works even better.

Ancra.

A passion for quality.

Quality equals security.

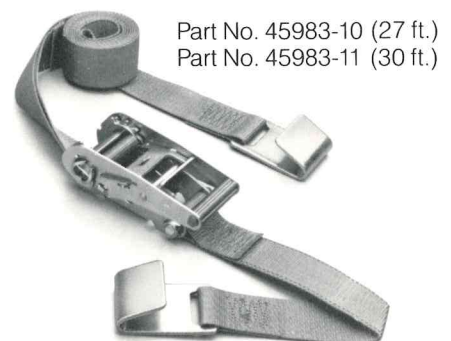

Ratchet Buckle Binders

Strong and simple to operate, Ancra Ratchet Buckle Binders combine advanced engineering and outstanding craftsmanship with the best materials. The unique patented features provide reliability and longevity.

Ancra Ratchet Buckles are now the standard of the industry. Each offers security from vibration release with an innovative latch and positive lock. The handle cross pin interlocks with the frame to reinforce assembly durability.

Together with sturdy, 2 in. Polyester Webbing, the Ratchet Buckles form secure, easy-to-use tiedowns.

Buckles are available in standard or long handled versions. Wrench-operated Buckles or other end hardware are also available on request.
