NEW TENSIONING BUCKLES

Introducing the addition of three new buckles to ANCRA's product line. These buckles are made to the same high standards as all of ANCRA's products. They're designed for use with 2" wide webbing and are described as follows:

2" RATCHET BUCKLE ASSEMBLY – This is a low profile version of our popular 43396 buckle. It is ideal for use on tarps where reduced wind resistance and strength are important. It also has wide use in interior van applications. The buckle has a 4,500 lb. breaking strength, (1,500 lb. working load rating). Zinc plated gold chromate finish for corrosion resistance.

Part Number 44258-10 – Without nut, bolt and spacer
44258-11 – With nut, bolt and spacer
