

SNOWMOBILE TIEDOWN

A TIEDOWN JUST FOR SNOWMOBILES

MOST SNOWMOBILE TIEDOWNS...

Most tiedowns used for transporting snowmobiles do not consider the harsh conditions associated with snowmobiling. Salt spray from the roads rust the buckles, snow and ice form and collect on the buckles making them inoperable, cam buckles are hard to release with gloved hands, and it is difficult to get a cam buckle strap tight enough.

ANCRA'S SNOWMOBILE TIEDOWN...

This new snowmobile tiedown offers solutions to these problems. It has Ancra's patented 1" mini ratchet buckle to get greater tension, while allowing for easy operation. It has a built in polyester pouch that wraps around the buckle to protect it from the road salts and the build up of snow and ice. The pouch even acts as a storage pouch when the strap is being used. With a little care this tiedown is sure to give many years of service.

This 4' long tiedown has a minimum breaking strength of 1200 lbs. (400 lb. working load) and comes in black only. It is display packaged individually in a polybag with header card.

With a minimum of care this tiedown is sure to last many seasons.

Part No. 48767-10 Snowmobile Tiedown – Black
