

FALLEN FREIGHT?

WE HAVE THE ANSWER!

ANCRA'S NEW FREIGHT SAVER "THE CRITTER"™

Introducing "The Critter"™ – your ultimate solution for efficiently recovering shifted freight. Designed to minimize freight damage and reduce the risk of injuries, "The Critter" allows operators to carefully reposition and stabilize freight that has shifted, ensuring it can be easily removed.

FEATURES

- Chain attaches "The Critter" to forklift for added security
- Easily lift freight that has shifted off of the deck or rack
- Skids can be lifted off the deck bar or rack to adjust beams
- Remove shifted freight quickly with minimized damage
- Size: 73in x 20in x 17in
- Weight: 126 lbs / 57 kgs
- Working Load Limit: 1,500 lbs / 680 kgs

For use in a trailer or warehouse racks where freight has shifted.

Using "The Critter", the forklift becomes a tool to re-stabilize loads that have shifted. Move "The Critter" into position under the unstable load and lift it up, off the support beams. With the load supported, you can now reposition beams if needed and then lower "The Critter" to position the load back on the beams. After this is done, the load may be removed from the trailer or rack as usual.

**The Critter is NOT for raising deck bars &/or freight to the ceiling.*

**NEVER adjust deck bars when loaded.*
