50514-10 Panel Size (1): 96" h x 48" w x 4" d	Single Panel Weight: 44 lbs. / 20 kg.
50515-10 (2) Panel Size: 96" h x 96" w x 4" d	Heavy Duty Beams QTY: 2 (49039-59) Total Kit Weight: 133 lbs. / 60 kg.
50515-11 (2) Panel Size: 96" h x 96" w x 4" d	Standard Duty Beams QTY: 2 (43638-59) Total Kit Weight: 126 lbs. / 57 kg.

LOCKABLE E-BEAM

Used with 49039-59 (HD) or 43638-59 (ST) lockable beams to provide a secure load divider for mixed loads

ERGONOMIC

Convenient hand slots make the panel easy to move into position for either a bulkhead or deck board application.

EASY TO HANDLE

Lighter than a typical plywood sheet used for a bulkhead or deck panel.

Includes complete setup and removal instructions on each panel

VERSATILE

Can also be transformed into a deck board for use on beams with 16" or 24" spacing.

TOUGH

High density polyethylene panels have excellent toughness and low temperature performance, down to -40°F.

When used as a decking board, the cargo carrying capacity is determined by the beams supporting it.
