

INTERIOR VAN RESTRAINT SYSTEMS

A PASSION FOR QUALITY

Ancra never wants you to know the meaning of a spilled load. That's why we're committed to providing you with the finest cargo restraint and handling systems in the world.

Tested for quality.

Our full line of van and flat-bed equipment has been tested and retested against the strictest standards in the nation. Made from high quality materials, every unit must be right, or you'll never see it on your rig.

Engineering excellence.

Ancra engineers are continually innovating and improving designs for efficiency and safety. With load security, convenience and durability in mind, our products have set industry standards. We make cargo restraint systems that won't fail you.

All because of our passion for quality.

The industry standard.

Cargo-Sta[®] (Shown above)

Ancra's high-strength aluminum Cargo-Sta Cargo Bar expands to fit securely against the sides of trailer or truck walls and held in place with durable, molded rubber "feet." Designed for easy operation even at low temperatures with gloved

hands, the 1.5 in. diameter Cargo-Sta offers strong support for your cargo, no matter what size load in your van. Length adjusts from 89.75 to 104.5 in.

Part No. 43782-15 1.5 in. diameter
Part No. 43782-16 1.62 in. diameter

Cargo Hoops, in sets of two, are mounted to Cargo-Sta for effective retention of small packages.
