PAN FITTINGS

ANCRA introduces eight new pan fittings to its ever increasing product line of securement devices. These pan fittings are available in two distinct styles, one is a heavy duty fitting with an articulated ring while the second is a medium duty fitting available in three models.

Pan Fitting with articulated ring – This heavy duty fitting was designed and developed for military applications. This pan fitting meets the standards established in MIL Std-209 for Class 4, 5000 lb. tiedowns. It's made from 4130 heat treated alloy steel and zinc plate Olive drab. The fitting has a breaking strength of 7,500 lbs. and a working load rating of 2,500 lbs.

Part Number 47630-10 – O.D. finish, with slotted pan as shown
47630-20 – Gold chromate finish, without slots in pan
